SKID GRIP PERFORMANCE

Skid Grip provides a slip resistant surface that is specifically designed to beautify existing concrete, asphalt, and other surfaces. The 100% acrylic formulation provides increased performance and reduces oxidation. This prevents peeling, flaking and the erosion of the concrete surface below, keeping the integrity of the anti-slip surface intact for years to come.

Skid Grip Anti-Slip Paint is a cost effective way to enhance the landscape of any project. This durable, 100% acrylic anti-slip finish has superior adhesion to prevent flaking and peeling on both concrete and asphalt. Create beautiful walkways, patios, pool decks, sport courts, ramps and driveways that are attractive, practical and economical.

Skid Grip Anti-Slip Paint provides an extra layer of protection from ultra violet exposure and will provide a beautiful finish for medium to high use traffic areas. Skid Grip's medium texture surface is available in 7 standard long lasting colors plus white and 2 bases for limitless design possibilities.

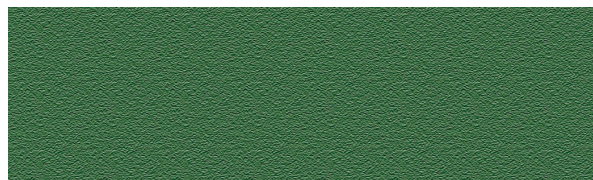

CAUTION: FLOOR FINISHES ARE MORE SLIPPERY WHEN THE SURFACE BECOMES WET OR CONTAMINATED BY DIRT, OILS, FOOD/BEVERAGE RESIDUES OR OTHER DEBRIS. TO ATTAIN THE BEST POSSIBLE SKID RESISTANCE, KEEP COATED AREAS DRY, PROPERLY CLEANED AND MAINTAINED.
