Version No: 1.1 Safety Data Sheet according to OSHA HazCom Standard (2012) requirements Issue Date: **09/24/2018** Print Date: **09/24/2018** S.GHS.USA.EN

# **SECTION 1 IDENTIFICATION**

### **Product Identifier**

| Product name                  | Vogue Theatrical Paint Ochre - F000V23 |
|-------------------------------|----------------------------------------|
| Synonyms                      | Not Available                          |
| Other means of identification | Not Available                          |

### Recommended use of the chemical and restrictions on use

| Relevant identified uses | Theatrical Paint |
|--------------------------|------------------|
|--------------------------|------------------|

### Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

| Registered company name | ICP Construction                          |
|-------------------------|-------------------------------------------|
| Address                 | 150 Dascomb Road Andover MA United States |
| Telephone               | 978-623-9980                              |
| Fax                     | Not Available                             |
| Website                 | http://www.icp-construction.com/          |
| Email                   | Not Available                             |

### **Emergency phone number**

| Association / Organisation        | Chemtel        |
|-----------------------------------|----------------|
| Emergency telephone numbers       | 1-800-255-3924 |
| Other emergency telephone numbers | 1-813-248-0585 |

# **SECTION 2 HAZARD(S) IDENTIFICATION**

### Classification of the substance or mixture

Note: The hazard category numbers found in GHS classification in section 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

Classification

Skin Corrosion/Irritation Category 2, Serious Eye Damage Category 1, Carcinogenicity Category 1A, Specific target organ toxicity - single exposure Category 3 (respiratory tract irritation)

### Label elements

Hazard pictogram(s)

SIGNAL WORD

DANGER

# Hazard statement(s)

| H315 | Causes skin irritation.           |
|------|-----------------------------------|
| H318 | Causes serious eye damage.        |
| H350 | May cause cancer.                 |
| H335 | May cause respiratory irritation. |

Version No: 1.1

Issue Date: 09/24/2018 Print Date: 09/24/2018

### Hazard(s) not otherwise specified

Not Applicable

### Precautionary statement(s) General

| P101 | If medical advice is needed, have product container or label at hand. |
|------|-----------------------------------------------------------------------|
| P102 | Keep out of reach of children.                                        |

### Precautionary statement(s) Prevention

| P201 | Obtain special instructions before use.         |
|------|-------------------------------------------------|
| P271 | Use only outdoors or in a well-ventilated area. |

### Precautionary statement(s) Response

| P305+P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |
|----------------|----------------------------------------------------------------------------------------------------------------------------------|
| P308+P313      | IF exposed or concerned: Get medical advice/attention.                                                                           |

### Precautionary statement(s) Storage

| P405      | Store locked up.                                                 |
|-----------|------------------------------------------------------------------|
| P403+P233 | Store in a well-ventilated place. Keep container tightly closed. |

### Precautionary statement(s) Disposal

Dispose of contents/container in accordance with local regulations.

# SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

### Substances

See section below for composition of Mixtures

#### **Mixtures**

| CAS No     | %[weight] | Name                       |
|------------|-----------|----------------------------|
| 1332-58-7  | <1        | <u>kaolin</u>              |
| 51274-00-1 | 10.88     | C.I. Pigment Yellow 42     |
| 471-34-1   | 9-16      | calcium carbonate          |
| 68476-25-5 | <1        | <u>feldspars</u>           |
| 1317-65-3  | 2.25      | limestone                  |
| 1317-70-0  | <1        | titanium dioxide (anatase) |
| 57-55-6    | 1-5       | propylene glycol           |

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

## **SECTION 4 FIRST-AID MEASURES**

## Description of first aid measures

| Eye Contact  | If this product comes in contact with the eyes:  Immediately hold eyelids apart and flush the eye continuously with running water.  Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.  Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes.  Transport to hospital or doctor without delay.  Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin Contact | If skin contact occurs:  Immediately remove all contaminated clothing, including footwear.  Flush skin and hair with running water (and soap if available).  Seek medical attention in event of irritation.                                                                                                                                                                                                                                                                                                                                                      |
| Inhalation   | <ul> <li>If fumes or combustion products are inhaled remove from contaminated area.</li> <li>Lay patient down. Keep warm and rested.</li> <li>Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.</li> <li>Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary.</li> <li>Transport to hospital, or doctor, without delay.</li> </ul>                         |
| Ingestion    | <ul> <li>Immediately give a glass of water.</li> <li>First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                              |

# Most important symptoms and effects, both acute and delayed

### Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

See Section 11

Version No: 1.1

### **Vogue Theatrical Paint Ochre - F000V23**

Issue Date: **09/24/2018** Print Date: **09/24/2018** 

For acute or short term repeated exposures to iron and its derivatives:

- Always treat symptoms rather than history.
- In general, however, toxic doses exceed 20 mg/kg of ingested material (as elemental iron) with lethal doses exceeding 180 mg/kg.
- F Control of iron stores depend on variation in absorption rather than excretion. Absorption occurs through aspiration, ingestion and burned skin.
- ▶ Hepatic damage may progress to failure with hypoprothrombinaemia and hypoglycaemia. Hepatorenal syndrome may occur.
- Fron intoxication may also result in decreased cardiac output and increased cardiac pooling which subsequently produces hypotension.
- Serum iron should be analysed in symptomatic patients. Serum iron levels (2-4 hrs post-ingestion) greater that 100 ug/dL indicate poisoning with levels, in excess of 350 ug/dL, being potentially serious. Emesis or lavage (for obtunded patients with no gag reflex) are the usual means of decontamination.
- Activated charcoal does not effectively bind iron.
- Catharsis (using sodium sulfate or magnesium sulfate) may only be used if the patient already has diarrhoea.
- ▶ Deferoxamine is a specific chelator of ferric (3+) iron and is currently the antidote of choice. It should be administered parenterally. [Ellenhorn and Barceloux: Medical Toxicology]

## **SECTION 5 FIRE-FIGHTING MEASURES**

### Extinguishing media

- ▶ There is no restriction on the type of extinguisher which may be used.
- Use extinguishing media suitable for surrounding area.

### Special hazards arising from the substrate or mixture

| Fire Incompatibility                                           | compatibility None known.                                                                                                                                            |  |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Special protective equipment and precautions for fire-fighters |                                                                                                                                                                      |  |
| Fire Fighting                                                  | <ul> <li>Alert Fire Brigade and tell them location and nature of hazard.</li> <li>Wear breathing apparatus plus protective gloves in the event of a fire.</li> </ul> |  |
| Fire/Explosion Hazard                                          | Non combustible. Not considered a significant fire risk, however containers may burn. May emit poisonous furnes. May emit corrosive furnes.                          |  |

### **SECTION 6 ACCIDENTAL RELEASE MEASURES**

### Personal precautions, protective equipment and emergency procedures

See section 8

### **Environmental precautions**

See section 12

## Methods and material for containment and cleaning up

| Minor Spills | Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. |
|--------------|------------------------------------------------------------------------------------------|
| Major Spills | Moderate hazard. ▶ Clear area of personnel and move upwind.                              |

Personal Protective Equipment advice is contained in Section 8 of the SDS.

## **SECTION 7 HANDLING AND STORAGE**

### Precautions for safe handling

| Precautions for safe nandling | 9                                                                                                                                                                                                                   |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Safe handling                 | <ul> <li>Avoid all personal contact, including inhalation.</li> <li>Wear protective clothing when risk of exposure occurs.</li> <li>DO NOT allow clothing wet with material to stay in contact with skin</li> </ul> |
| Other information             |                                                                                                                                                                                                                     |

| Conditions for safe storage  | including any incompatibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Conditions for sale storage, | including any incompatibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Suitable container           | Polyethylene or polypropylene container.     Packing as recommended by manufacturer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Storage incompatibility      | Calcium carbonate:  is incompatible with acids, ammonium salts, fluorine, germanium, lead diacetate, magnesium, mercurous chloride, silicon, silver nitrate, titanium.  Contact with acid generates carbon dioxide gas, which may pressurise and then rupture closed containers  For iron oxide (ferric oxide):  Avoid storage with aluminium, calcium hypochlorite and ethylene oxide.  Risk of explosion occurs following reaction with powdered aluminium, calcium silicide, ethylene oxide (polymerises), carbon monoxide, magnesium and perchlorates.  WARNING: Avoid or control reaction with peroxides. All transition metal peroxides should be considered as potentially explosive.  Acetic acid:  vapours forms explosive mixtures with air (above 39 C.)  reacts violently with bases such as carbonates and hydroxides (giving off large quantities of heat), oxidisers, organic amines, acetaldehyde, potassium tert-butoxide  reacts (sometimes violently), with strong acids, aliphatic amines, alkanolamines, alkylene oxides, epichlorohydrin, acetic anhydride, 2-aminoethanol, ammonia, ammonium nitrate, bromine pentafluoride, chlorosulfonic acid, chromic acid, chromic mitroxide, ethylenediamine, ethyleneimine, hydrogen peroxide, isocyanates, oleum, perchloric acid, permanganates, phosphorus trichloride, sodium peroxide, xylene  attacks cast iron, stainless steel and other metals, forming flammable hydrogen gas  attacks many forms of rubber, plastics and coatings |

## **Exposure controls**

| Appropriate engineering controls | Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.                                                                                                                                                                                                             |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal protection              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inhaled                                | The material can cause respiratory irritation in some persons. The body's response to such irritation can cause further lung damage.  The material has NOT been classified by EC Directives or other classification systems as "harmful by inhalation". This is because of the lack of corroborating animal or human evidence.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                    |               |  |  |
| Ingestion                              | The material has <b>NOT</b> been classified by EC Directives or other classification systems as "harmful by ingestion". This is because of the lack of corroborating animal or human evidence.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                    |               |  |  |
| Skin Contact                           | This material can cause inflammation of the skin on contact in some persons.  The material may accentuate any pre-existing dermatitis condition  Skin contact is not thought to have harmful health effects (as classified under EC Directives); the material may still produce health damage following entry through wounds, lesions or abrasions.  Open cuts, abraded or irritated skin should not be exposed to this material  Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.                                                                                                                                                                                                                                                                    |                                                                                    |               |  |  |
| Eye                                    | If applied to the eyes, this material causes severe eye damage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                    |               |  |  |
| Chronic                                | Studies show that inhaling this substance for over a long period (e.g. in an occupational setting) may increase the risk of cancer.  Repeated or long-term occupational exposure is likely to produce cumulative health effects involving organs or biochemical systems.  Long-term exposure to respiratory irritants may result in airways disease, involving difficulty breathing and related whole-body problems.  Chronic excessive intake of iron have been associated with damage to the liver and pancreas. People with a genetic disposition to poor control over iron are at an increased risk.  There has been some concern that this material can cause cancer or mutations but there is not enough data to make an assessment.  Overexposure to the breathable dust may cause coughing, wheezing, difficulty in breathing and impaired lung function. Chronic symptoms may include decreased vital lung capacity and chest infections. |                                                                                    |               |  |  |

PIGMENT YELLOW 42                                                                       | The substance is classified by IARC as Group 3:  NOT classifiable as to its carcinogenicity to humans.  Evidence of carcinogenicity may be inadequate or limited in animal testing.                                                                                                                                                                                                      |                          |          |
| LIMESTONE                                                                                    | Eye (rabbit) 0.75: mg/24h -                                                                                                                                                                                                                                                                                                                                                              |                          |          |
| TITANIUM DIOXIDE (ANATASE)                                                                   | Exposure to titanium dioxide is via inhalation, swallowing or skin contact. When inhaled, it may deposit in lung tissue and lymph nodes causing dysfunction of the lungs and immune system.                                                                                                                                                                                              |                          |          |
| PROPYLENE GLYCOL                                                                             | The acute oral toxicity of propylene glycol is very low; large amounts are needed to cause perceptible health damage in humans. Serious toxicity generally occurs only at blood concentrations over 1 g/L, which requires extremely high intake over a relatively short period of time; this is nearly impossible with consuming foods or supplements which contain 1g/kg of PG at most. |                          |          |
| Vogue Theatrical Paint Ochre -<br>F000V23 & C.I. PIGMENT<br>YELLOW 42 & CALCIUM<br>CARBONATE | Asthma-like symptoms may continue for months or even years after exposure to the material ends. This may be due to a non-allergic condition known as reactive airways dysfunction syndrome (RADS) which can occur after exposure to high levels of highly irritating compound.                                                                                                           |                          |          |
| KAOLIN & C.I. PIGMENT<br>YELLOW 42 & FELDSPARS                                               | No significant acute toxicological data identified in literature search.                                                                                                                                                                                                                                                                                                                 |                          |          |
| CALCIUM CARBONATE & LIMESTONE                                                                | The material may produce severe irritation to the eye causing pronounced inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis.  No evidence of carcinogenic properties. No evidence of mutagenic or teratogenic effects.                                                                                                                                 |                          |          |
| CALCIUM CARBONATE &<br>LIMESTONE & PROPYLENE<br>GLYCOL                                       | The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.                                                                                                                                                                                           |                          |          |

### DO NOT discharge into sewer or waterways.

### Persistence and degradability

| Ingredient                 | Persistence: Water/Soil | Persistence: Air |
|----------------------------|-------------------------|------------------|
| titanium dioxide (anatase) | HIGH                    | HIGH             |
| propylene glycol           | LOW                     | LOW              |

### **Bioaccumulative potential**

| Ingredient                 | Bioaccumulation |
|----------------------------|-----------------|
| titanium dioxide (anatase) | LOW (BCF = 10)  |
| propylene glycol           | LOW (BCF = 1)   |

### Mobility in soil

| •                          |                   |
|----------------------------|-------------------|
| Ingredient                 | Mobility          |
| titanium dioxide (anatase) | LOW (KOC = 23.74) |
| propylene glycol           | HIGH (KOC = 1)    |

## **SECTION 13 DISPOSAL CONSIDERATIONS**

### Waste treatment methods

Product / Packaging disposal

Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area.

- ▶ DO NOT allow wash water from cleaning or process equipment to er
  - It may be necessary to collect all wash water for treatment before disposal.
  - ▶ Recycle wherever possible.
    - Consult manufacturer for recycling options or consult local or regional waste management authority for disposal if no suitable treatment or disposal facility can be identified.

## **SECTION 14 TRANSPORT INFORMATION**

### **Labels Required**

Marine Pollutant NC

Land transport (DOT): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Air transport (ICAO-IATA / DGR): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Sea transport (IMDG-Code / GGVSee): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Transport in bulk according to Annex II of MARPOL and the IBC code

Not Applicable

## **SECTION 15 REGULATORY INFORMATION**

Safety, health and environmental regulations / legislation specific for the substance or mixture

## Vogue Theatrical Paint Ochre - F000V23

Version No: 1.1 Print Date: 09/24/2018

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings

## **Definitions and abbreviations**

PC-TWA: Permissible Concentration-Time Weighted Average PC-STEL: Permissible Concentration-Short Term Exposure Limit

IARC: International Agency for Research on Cancer

ACGIH: American Conference of Governmental Industrial Hygienists

STEL: Short Term Exposure Limit

TEEL: Temporary Emergency Exposure Limit。

IDLH: Immediately Dangerous to Life or Health Concentrations

OSF: Odour Safety Factor

NOAEL :No Observed Adverse Effect Level LOAEL: Lowest Observed Adverse Effect Level

TLV: Threshold Limit Value LOD: Limit Of Detection OTV: Odour Threshold Value BCF: BioConcentration Factors BEI: Biological Exposure Index
